

ATOMiK Financial Static Summary

This is a static export for reviewers who cannot rely on XLSX formula recalculation. Use the workbook as the detailed source, but use this file/PDF for quick diligence review.

Use Of Funds

Category	Target	Target percent
Engineering and demo hardening	\$1.5M	30.0%
Customer proof	\$1.0M	20.0%
IP and legal	\$750K	15.0%
ASIC feasibility	\$750K	15.0%
Finance, GTM, and ops	\$600K	12.0%
Reserve	\$400K	8.0%
Total	\$5.0M	100.0%

Runway

Scenario	Raise	Reserve	Spendable cash	Planning months	Gross monthly budget	Ex-reserve monthly budget
Staged close	\$3.0M	\$250K	\$2.75M	18	~\$167K/mo	~\$153K/mo
Target	\$5.0M	\$400K	\$4.60M	24	~\$208K/mo	~\$192K/mo
Expanded	\$7.5M	\$600K	\$6.90M	24	~\$313K/mo	~\$288K/mo

Expanded capacity means faster validation, hiring, and broader evaluation/ASIC feasibility support. It does not convert the round into tape-out funding.

Founder-Prepared Revenue Scenario

This is a planning scenario for investor discussion, not a forecast. Revenue depends on signed SOWs, measured workload proof, and partner diligence.

Window	Commercial motion	Planning revenue range	Evidence gate
0-6 months	Qualified proof reviews / technical evaluations	\$0-\$150K	scoped evaluation candidates and baseline definitions
6-12 months	2-3 paid evaluation or design-partner SOWs	\$250K-\$750K	signed SOWs with success metrics and readout artifacts

Window	Commercial motion	Planning revenue range	Evidence gate
12-24 months	1-2 licensing or design-partner conversions if proof holds	\$1M-\$3M potential contracted value	measured workload proof and partner diligence
24-36 months	1-3 IP/license relationships if proof and economics hold	\$3M-\$8M annualized potential	counsel-reviewed IP packet, feasibility review, and customer evidence

Commercial assumptions:

- Proof review / technical evaluation: \$25K-\$75K scoped work where appropriate.
- Design-partner validation: \$100K-\$250K scoped validation or integration work where appropriate.
- Licensing path: upfront licensing plus per-unit royalty only after workload proof, IP diligence, and partner fit support it.
- Do not present this table as committed pipeline, signed revenue, or guaranteed ROI.

Dilution Sensitivity

Illustrative SAFE cap math only. This is not a cap recommendation and excludes option-pool, prior-instrument, side-letter, and priced-round mechanics.

Post-money cap	\$3.0M staged	\$5.0M target	\$7.5M expanded
\$20M	15.0%	25.0%	37.5%
\$25M	12.0%	20.0%	30.0%
\$30M	10.0%	16.7%	25.0%
\$40M	7.5%	12.5%	18.8%
\$50M	6.0%	10.0%	15.0%

Milestone Gates

Window	Milestone	Evidence gate
0-30 days	Lock financing structure, counsel plan, design-partner target list	CFO/counsel reviewed plan
30-60 days	Harden Zynq demo into repeatable package	Demo checklist and current artifact bundle
60-90 days	Define first customer workload and baseline plan	Evaluation SOW and one success metric
90-180 days	Produce first measured workload artifact	Correctness-preserving workload result
6-9 months	Convert artifact into paid	Customer decision record

Window	Milestone	Evidence gate
	evaluation, LOI, or no-fit decision	
9-12 months	Complete ASIC feasibility scope and IP diligence packet	Mentor-reviewed feasibility and counsel-reviewed IP memo
12-24 months	Prepare next financing or strategic partner process	Measured proof, partner pipeline, IP packet

Workbook Additions

- README Model Map tab: intended use, owner, assumptions, investor-facing/internal sheet map, source pointer, and open diligence gaps.
- Unmodeled CFO Needs tab: payroll taxes, benefits, insurance, accounting, legal close, C-Corp conversion, IP prosecution variability, tooling, infrastructure, travel, and contingency items.
- Evaluation SOW Economics tab: planning-only structure for workload intake, baseline mapping, success metric, test harness/artifacts, readout, optional partner-funded proof work, pricing, and accounting treatment.

Guardrails

- Do not state a valuation cap without CFO/counsel approval.
- Do not present planning revenue ranges as booked revenue, committed pipeline, or a forecast before signed SOWs or licensing terms.
- Do not claim customer traction, production silicon, tape-out funding, or downstream savings.
